Continuation Sheet (PTOL-303) 10/016,713

Application No.

Continuation of 2. NOTE: The amendment filed 10/19/2004 in reply to the final rejection has been considered but is not deemed to place the application in condition for allowance and will not be entered because: The proposed amendment raises new issues that would require further consideration and/or search. The amended independent claims now add the limitation "... wherein the first lens formation pattern includes a boundary for each of a first plurality of micro-lenses to be formed, and wherein the first lens formation pattern includes a setback from the boundary for each of the first plurality of micro-lenses to be formed, wherein the second lens formation pattern further includes a setback from the boundary for each of the second plurality of micro-lenses to be formed..." where there was no mention within the claims of this limitation. While this places the application in better condition for allowance, it raises new issues into the prosecution of the instant application and would thus provide grounds for a new search.
